

SOFTWARE DEVELOPMENT

SOFTWARE UPGRADES & CONVERSIONS

When you're faced with the need to upgrade and modernize your system, **LaunchIT** can help. Whether it's because of a legacy technology, older inefficient systems, discontinued products, increased prices, or functionality, our experts are there to offer suggestions. We will study your current IT system's landscape to determine the most efficient and best possible solution to ensure that upgrades/conversions to your system happens in parallel to your existing systems. To avoid any hindrances to your business operations we will layout out a plan for a smooth transition to new upgraded/converted systems.

UPGRADES CAN BOOST PRODUCTIVITY AND EFFICIENCY

LaunchIT developers continually strive to enhance the functionality of our solutions. This is beneficial to productivity inside your business because lost time due to tedious tasks can be reduced.

UPGRADES CAN LOWER COSTS

Maintaining old and outdated software can cost your business more than it is to upgrade or convert to a new one. Without those updates you're left to worry about how scalable and maintainable your software is.

UPGRADES IMPROVE SECURITY

Hackers are more likely to have found time to identify security vulnerabilities the longer the software has been on the market. Often, upgrades include patches and bug fixes to address these vulnerabilities.

DATA MIGRATIONS OR CONVERSIONS

If your business has chosen to move to another platform, data repository, or have plans of moving to a cloud environment, **LaunchIT** experts are skilled in the mapping of data from your existing system to the new one. Our experts take the utmost pride in keeping your core data integrity intact and ensure the retrieval of your data is easy, secure, and efficient.

EXPERIENCED TEAM

Our Data Migration specialists have completed hundreds of large- or small-scale migration projects. They will guide you through the transition and guarantee it is as seamless as possible.

MOVE WITHOUT WORRY

You provide us with the data, and you can count on us to convert it. Our process is perfected and ensures that your data is transitioned quickly and reliably.
